

We believe that your clearinghouse should offer you the **peace of mind** in knowing what your costs will be **each month**.

With so many options available, choosing a cost-effective clearinghouse can be a daunting task. How much should you be paying to submit claims, what other costs are involved, and what should you avoid?

Processing your claims shouldn't be time consuming or expensive. After all, your focus is on caring for your patients and not on monitoring the expense associated with every claim you submit.

With this in mind you should **be wary of any clearinghouse that:**

- Charges an annual maintenance fee
- Does not offer a money back guarantee
- Charges you a per claim fee for every claim you submit
- Charges you for customer support

At Apex EDI, we believe that your clearinghouse should offer a simple approach to submitting your claims and offer you the peace of mind in **knowing what your costs will be each month, regardless of the number of electronic claims you send**. We also believe in offering superior customer support to our clients at no extra charge. Our solution is ready to save your practice time and money — no matter what practice management software or electronic claims processing system you use today.

**The benefits of using Apex are:**

- No annual maintenance fees
- Up to 60 days free eclaims
- Money back guarantee
- Pay one low monthly fee for electronic claims processing — no matter how many claims you submit
- Call our service and support staff any time for **fast, friendly**, and **free help** with questions or concerns.
